

MARINE CONSULTANCY STAFF PROFILES – APAC

Technical Investigations and Quantum

Graeme Temple – Managing Director
Marine Engineer
Mobile Phone: +65 9624 9641
Office Phone: +65 6517 6860
Email: graeme.temple@braemar.com

As Regional Director for Braemar MARINE in Asia, Graeme oversees the operations in Asia. He is a marine engineer holding a Class 1 Certificate of Competency (Motor) and a Chartered Member of the Institute of Marine Engineers. He has 21 years seagoing experience, including 15 years as Chief Engineer on a wide range of vessels including general cargo, container, LPG, AHTS vessel and fire-fighting and pollution control vessels. Graeme has specialist knowledge of marine machinery failures and bunker fuel oil quality investigations, as well as experience on super yachts and small craft. He has acted on behalf of many of the World's leading P&I Clubs and Marine Lawyers and acted as an expert witness.

Peter Ryan – Director of Consultancy (Asia)
Marine Engineer
Phone: +65 6517 6860
Email: peter.ryan@braemar.com

Peter is responsible for oversight and development of specialist consulting roles. He holds a Class 1 Marine Engineer's motor certificate of competency and is a Member of the Institute of Marine Engineers. He has 15 years of sea going experience on passenger ships with major cruise liner operators and ultimately served as a Chief Engineer. Whilst ashore Peter worked as a lubricant and fuel analyst for Shell and as a cargo and assurance consultant with BP. As a marine consultant and associated director with a major marine consultancy, Peter specialises in casualty investigation and legal support in off specification fuel cases, fire investigations, shipyard audits, thermographic surveys and STS cargo transfers. Peter is also a Lieutenant Commander in the Royal Naval Reserve. He has acted on behalf of many of the World's leading P&I Clubs and Marine Lawyers and acted as an expert witness.

Brian Armour
Senior Maritime Civil Engineer
Phone: +65 6517 6860
Email: singapore@braemar.com

Brian is a chartered structural engineer with thirteen years of experience in the design and construction management of marine and land-based projects including reclamation works, wharves and jetty's and bridges. His experience includes the design of piled structures including driven precast piles, cast in place concrete piers, and driven tubular steel sections. He also has extensive experience as a site engineer with a strong focus on piling driving engineering and supervision, installation of modular wharf construction, and installation of vendor supplied equipment on marine structures. Brian's experience covers the full range of project stages from early feasibility studies, detailed design, construction supervision, and then project close out.

Salvage and Marine Warranty

Geoff Holland – Chief Surveyor (Asia)
Master Mariner – SCR (Appointed)
(Sing): +65 6517 6860
(Malaysia): +60 177864529
Email: singapore@braemar.com

As Chief Surveyor for Asia Geoff is responsible for general oversight of H&M and Warranty Surveys. He has a Class 1 Master Mariner and Special Casualty Representative, with 20 years deep sea experience on reefers, general cargo, container and products carriers and extensive offshore experience on DP subsea construction, rig moves and AHTS vessels. A surveyor of 13 years, Geoff has regularly attended H&M surveys (casualty & risk), P&I surveys (casualty & risk), warranty surveys such as tow approvals, voyage approvals, JH surveys, project cargoes and given regular consultancy and Legal support.

Project Cargo

**Robert Kerr – Principal Surveyor Shanghai
Mariner
Phone: +86 186 2133 2502
Email: shanghai@braemar.com**

Robert was a Commissioned Officer and served with the South African Navy for 9 years, 4 years on surface vessels and 5 years as a submariner. On leaving, Robert worked as a tug master for 8 years. Robert has worked as a Marine Surveyor for the last 11 years, initially in Richards Bay for 2 years, a further 7 years in the Middle East (based in the U.A.E.) and has been with Braemar Salvage Association in the Far East for the last 4 years. While working as a Marine Surveyor in the Middle East Robert also acted as DPA and ship repair manager for offshore vessels as part of the management company managing the Halliburton and Subsea Tech Offshore support vessels based in the Persian Gulf.
