OFFICE ADDRESS: Dubai World Trade Centre Building, 15th Level PO Box 9222, Dubai, UAE

PHILOSOPHY

Braemar Technical Services is dedicated to providing the most professional loss adjusting and other expert services, supplying integrated capabilities of the highest calibre, and meeting the diverse demands of specialist insurance markets worldwide.

Braemar Technical Services is becoming the benchmark for professional service levels in their sector by continuing to invest in its people and infrastructure through a combination of selective recruitment, formal training, systems development, mentoring, and peer support.

Braemar Technical Services believes their services are most effective when all parties trust and rely upon professional independence.

OUR SERVICE

Braemar Adjusting has provided Energy, Marine and Property Insurers, Brokers and Assureds with the highest quality, professional Loss Adjusting and Surveying services enabling Insurers to reach amicable and equitable settlement of claims made by their Assureds. This service includes:

- ✚ Immediate response, including site visits by relevant technical personnel.
- ✚ Timely clear, concise communication, and regular formal reporting.
- ✚ Accurate reserve information revised as appropriate throughout the job.
- ✚ Full investigation of circumstances, causation, and future loss prevention.
- ✚ Advice on the suitability and cost of remedial measures.
- ✚ Review of all contracts with relevance to insurable interest, indemnification, and subrogation.
- ✚ Complete policy review, identifying terms and conditions relevant to the claim.
- ✚ Review of recovery and subrogation potential.
- ✚ Adjustment taking full account of the policy wording, law, and relevant practice.
- ✚ Impartiality.

OUR EXPERIENCE

The Middle East office was launched in April 2013 and is the latest addition to our global network. Our team of internationally market recognised loss adjusters has comprehensive knowledge of Onshore and Offshore risks and 35 years of specialist energy insurance experience. In addition, we have a resident Iraq team of multi-disciplined engineers serving the three strategic Iraqi provinces of Baghdad, Basra and Erbil. The integrated loss adjusting services that we provide throughout in the MENA region includes Onshore and Offshore Oil & Gas, Power Generation & Utilities, Construction, Engineering & Machinery Breakdown, Property and Business Interruption.

United Arab Emirates

Christopher Eades
Managing Director - MENA
Phone: +971 (0)4 331 3100
Mobile: +971 (0)56 115 7548
Email: chris.eades@braemar.com

Chris has been engaged in the loss adjusting profession for over 30 years working in a variety of specialist positions managing large and complex claims on a global basis. He has dealt with multimillion dollar cases in the Oil & Gas, Power Generation, Construction & Engineering, Heavy Industries, Mining and Property sectors. Since joining Braemar in 2010, Chris has managed a significant portfolio of offshore and onshore insurance claims in the Middle East, Europe, Africa, Asia, and South America involving Platforms, Jack-Up Rigs, Floating Production Storage and Offloading Vessels (FPSO's), Subsea Pipelines and Cables, Mooring Systems, Land Rigs, Refineries, LNG Facilities, Chemical Plants, Power Plants and Steam & Gas Turbines.

In 2013, Chris transferred to Dubai from our London Head Office to take up the position of Managing Director for Middle East and North Africa (MENA) operations, where he has run Onshore and Offshore Energy, Construction, Power, Property and Liability related claims in the UAE, Bahrain, Egypt, Iran, Iraq, Kuwait, Libya, Oman, Qatar, Saudi Arabia, Tunisia and India, on behalf of regional Insurers and international Reinsurers.

Ali Ellesawy (LLB)
Loss Adjuster
Phone: +971 (0)4 331 3100
Mobile: +971 (0)50 409 1869
Email: ali.ellesawy@braemar.com

Ali joined Braemar in August 2012 after gaining an LLB (Hons) from the University of Hertfordshire. His degree studies included Criminal Law, Equity and Trusts, Law of the European Union, Contract, Tort, Land Law, Public Law, Evidence and Environmental law and during his final year he completed his dissertation on Human Rights.

Since joining Braemar, Ali has worked on and assisted in large and complex offshore and onshore oil and gas, fossil fuel power generation, renewable power generation, construction and engineering insurance claims. He is competent in spoken Arabic (North African Dialect) and currently improving both the spoken and written aspects of the language. Ali transferred to work with the Dubai team in 2015.

Dirk Jol (B.Sc.)
Loss Adjuster
Phone: +971 (0)4 331 3100
Mobile: +971 (0)56 115 7521
Email: dirk.jol@braemar.com

Dirk is a Civil Engineering graduate from Purdue University (US). With over 10 years of experience within the offshore construction industry, 8 years were spent providing subsea installation engineering support on multiple major subsea oil & gas EPIC projects, involved in all stages of the project life cycle, from FEED stage to offshore execution and completion. Joining Braemar in 2015, Dirk is able to apply his engineering experience to CAR and Ops losses. He transferred to work with the Dubai team in 2017.

Louis-Florent Daspre
(MEng CEng MChemE)
Loss Adjuster
Phone: +971 (0)4 331 3100
Mobile: +971 (0)56 623 6262
Email: louis.daspre@braemar.com

Louis-Florent graduated from the University of Nottingham, with the third of his four years spent at Lehigh University (USA), with a First-Class Masters degree in Chemical Engineering. After graduation, Louis-Florent joined an industrial gas company holding various roles across Europe in Supply Chain operations as well as Process Safety. There, he learned how to analyse plant operations and the risk and hazards involved in these, and how to mitigate them.

Before joining Braemar in Dubai in early 2017, Louis-Florent was the Facility Operations Supervisor of an Air Separation facility and Plant Manager of a helium plant, whilst also responsible for the distribution operation of helium across the UK and Ireland. He became a Chartered Engineer of the Institute of Chemical Engineers in 2015. Born in Paris, France, Louis-Florent was raised in England and speaks French and English fluently at a professional level.
